Quality backed by experience

Whirlpool Corporation first manufactured the french door refrigerator with an exterior ice and water dispenser in 2005 in Amana, Iowa. Whirlpool® french door refrigerators continue that tradition by offering industry-exclusive features and fresh innovations.

The right french door for everyone

Whirlpool® french door refrigerators are developed with your customers' needs in mind. Whether they are looking for the latest cooling, design or efficiency innovations, there's a Whirlpool® french door model that's right for them.

The **Ultimate** Customer

Consumer unmet need: Not enough storage

Previous french door refrigerator owners looking for enhanced performance and additional features will love a model with the most fresh food capacity available* and our AccuFresh™ dual cooling system.

Solution: All-inclusive model

A french door refrigerator that is not only a leader in capacity and storage, but also delivers the latest in cooling innovation.

Qualifying questions

- Does your current french door refrigerator provide enough capacity?
- Are you satisfied with the performance and food preservation of your current refrigerator?

Learn more on page 6

The **Space-Conscious** Customer

Consumer unmet need: Small spaces

Space-constrained customers in the market for a top-freezer model now have the option to take home a french door configuration thanks to this model's 30" wide design.

Solution: 30" wide design

A french door refrigerator that complements the smaller kitchens of downtown apartments and older homes.

Qualifying questions

- Do you frequently access items in the fresh food compartment?
- Where would you like to place your new refrigerator? What are the dimensions of the location?

Learn more on page 10

The **Transitional** Customer

Consumer unmet need: Not satisfied

Previous side-by-side model owners are selecting french door models for improved organization and interior configuration.

Solution: Optimal organization

A model that offers french door refrigeration innovation for a large segment of replacement business.

Qualifying questions

- Are you satisfied with the configuration of your current refrigerator?
- Are you looking to maximize fresh food space in your new refrigerator?

Learn more on page 14

The **Convenience** Customer

Consumer unmet need: Hard-to-reach food

Previous french door model owners are looking to upgrade to a newer model with additional access capabilities. Give your customers complete control over their storage options with this model's convenient external refrigerated drawer.

Solution: Flexible storage

A french door refrigerator that makes customizing storage and accessing fresh food easy with an external refrigerated drawer.

Qualifying questions

- Are you looking for organization solutions, especially for your fresh food?
- Do you have refrigerated items you frequently access?

2 ways to keep it cool

Whirlpool brand offers two different french door cooling systems to meet the needs of every customer.

Accu-Chill™ temperature management system

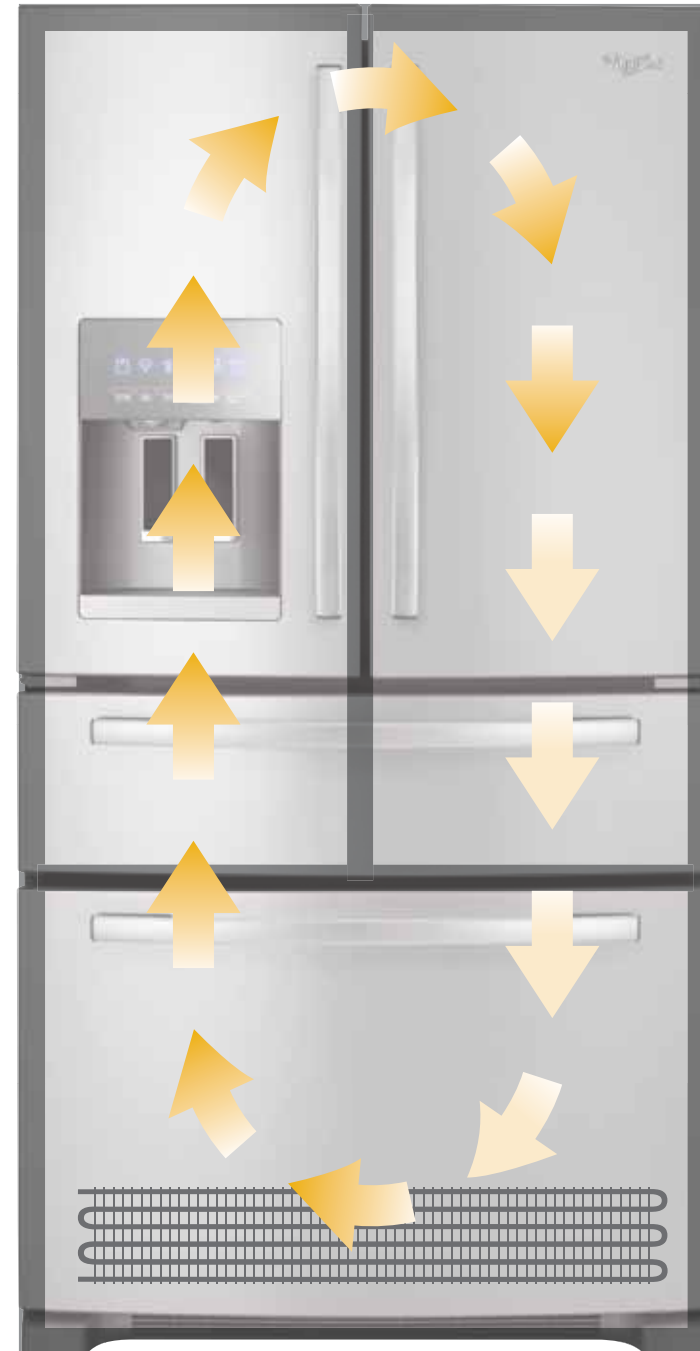

Select models feature a traditional, single evaporation system that monitors temperatures and uses a fan to move air from the freezer to the refrigerator. Built-in sensors activate the compressor only when necessary to conserve energy and keep food fresh.

How it works

1. A single evaporator works in sync with built-in sensors to monitor both the refrigerator and freezer compartment temperatures
2. When a change in temperature is detected, a vent and a fan allow air to flow between the two compartments as needed
3. The vent closes once the desired temperature has been reached

Adaptive Defrost (available with both cooling systems)

This feature provides improved food preservation by running the defrost cycle only when necessary. Sensors monitor how often the compressor operates, as well as when the doors are opened to help determine when a defrost cycle is necessary.

Consumer insight

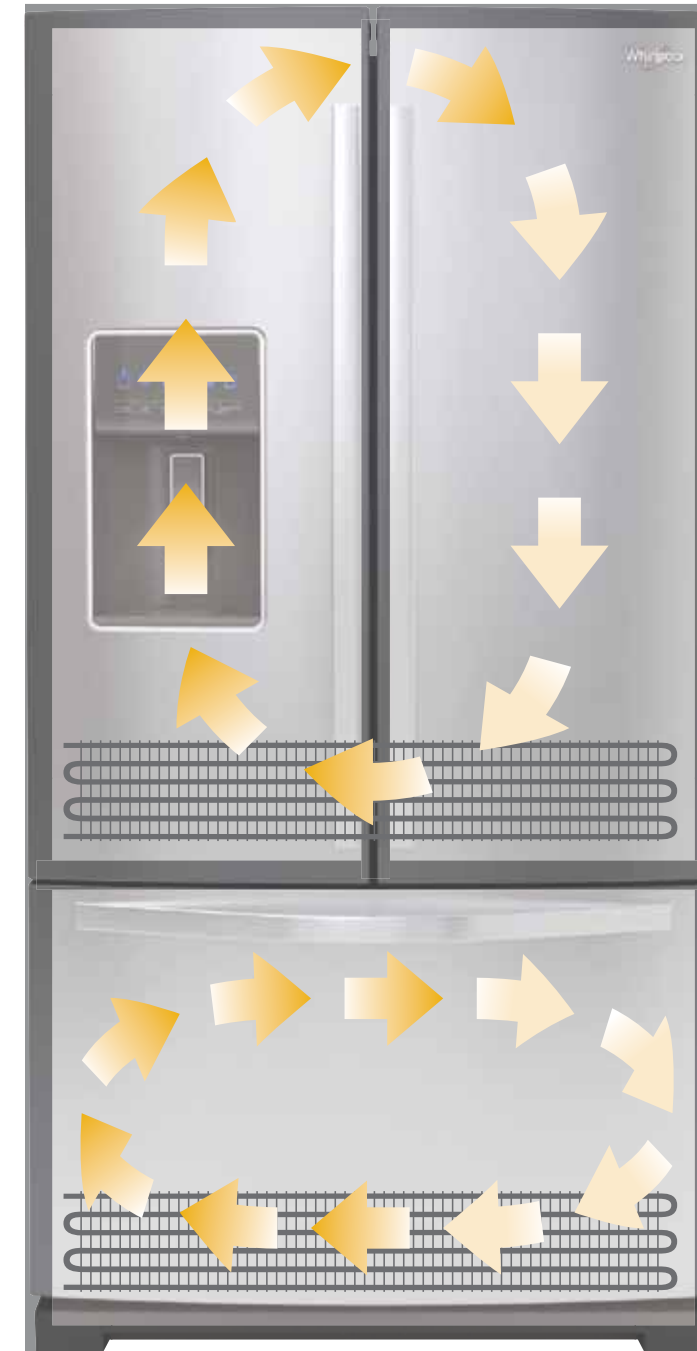

"I want my new refrigerator to store all my foods at the proper temperature."

Qualifying question

- How much food do you throw away because it was not kept cool enough or kept too cold?

Solution

The Accu-Chill™ system found on a large selection of Whirlpool® models provides responsive cooling throughout both compartments to ensure foods are stored at proper temperatures.

New!

AccuFresh™ dual cooling system

This innovative dual evaporator system found on select models helps keep crystals off ice cream and fruits and vegetables fresher. It uses the right humidity levels in the right compartments for improved food preservation.

How it works

1. Two separate evaporators in the refrigerator and freezer compartments work independently to monitor and adapt temperatures as needed
2. When a sensor determines that a change in temperature is needed, a control valve splits the flow of coolant, sending it to the evaporator controlling that compartment
3. The freezer maintains a dry, cold environment with low-humidity to help prevent frost and ice crystals while the fresh food compartment's evaporator provides a cool environment with higher humidity levels

Did you know?

Americans throw away almost 70% of the food they buy, listing spoilage as the primary reason.*

Consumer insight

"I don't want to be concerned about the freshness of the foods I serve my family."

Qualifying question

- How satisfied are you with the cooling performance of your current refrigerator?

Solution

The AccuFresh™ dual cooling system optimizes cooling performance by maintaining an ideal environment to improve food preservation, keeping fresh and frozen foods tasting the way they should.

The most fresh food capacity available*

The Ultimate Customer

More capacity in a standard footprint

This new 29 cu. ft. french door refrigerator packs in the most fresh food capacity available,* thanks to its innovative features and thinner vacuum insulation panels. This model offers the same footprint as our 26 cu. ft. models.

Maximizing storage space

With features that are designed to provide more storage, finding room for fresh and frozen food is easy.

In-Door-Ice® system

This ice dispensing system moves the ice bin to the door, creating room for an extra shelf in the refrigerator compartment. A removable, clear ice bin lets you fill coolers with ease.

25% more usable shelf space**

Innovative MicroEdge™ spill control shelves not only help contain leaks for easier cleanup, they also offer enough strength to hold up to 50 lbs of food.

Most door bin space in the industry†

Your customers can easily cool and access gallon jugs, 2-liter beverage containers, condiments and more with these adjustable door bins.

Temperature controlled pantry

A full-width temperature controlled pantry features white LED lighting and a wide opening to make locating and accessing fresh food easy. The Tap Touch controls offer multiple settings to accommodate stored items. Settings are available for proteins, dairy and cold beverages.

Stay flexible

Adjustable solutions for every storage need

Triple crisper system

Two larger crispers with humidity controls are great for fruits and vegetables, while the center crisper offers storage for small items like cheese and meat.

Fold-away shelf

The front of this adjustable shelf slides out of the way, creating temporary storage space for containers like 2-liter bottles, pitchers or a large salad bowl.

Pizza pocket

Tucked inside the freezer door, the pizza pocket holds multiple pizzas. Now, storing pizza boxes in the freezer drawer is easier than ever.

Freezer divider

Easily customize freezer storage and organize frozen food with the moveable freezer divider bin. This bin is ideal for small or loose freezer items.

Great looks can take you far

Complete your ultimate customer's Whirlpool® kitchen suite with this model's exceptional performance, contoured doors and sleek handles. But this french door isn't just a pretty face. Highlighting its easy-to-use exterior features can also help you close the sale.

Tap Touch controls

A sleek, high-tech interface allows customers to interact directly with the refrigerator and navigate through its features.

Measured Fill

Select the exact amount of filtered water needed—in ounces, cups or liters. The dispenser will fill the container and automatically shut off when complete.

Fast Ice option

By dropping the freezer temperatures for a full 24 hours, this option can increase ice production by over 30%.*

Sale sign off

and final tips for customers

Before your customers leave the store, share these tips that will make using their new refrigerator easier. Walking customers through this information will help improve their experience with Whirlpool® refrigerators and keep them coming back to your store.

Fresh sounds

Customers may notice new sounds and changes in the length of time the compressor is running. That's because new refrigerators use new energy-efficient design techniques to regulate refrigerator temperatures.

Water needs

To get your customer's ice and water dispenser up and running, they'll need a connection to a cold water supply with water pressure between 30 and 120 psi. Newer models* require between 35 and 120 psi. For best taste, use copper or PEX water lines. See product specifications for complete installation requirements.

Door seal

A vertical hinged seal is attached to the left refrigerator door. The hinge will automatically fold inward when the left door is opened. If both doors are opened, a seal will automatically form between the two doors when closed.

Moisture control

Reduce any moisture on the vertical door seal by activating the moisture control feature on the electronic display. This feature helps reduce moisture that may occur due to humid environments.

Sales that bring them back for more

Accessories may be small, but they offer a profit margin of 40% to 60%.* Mix accessories into every appliance purchase and you'll not only create happy customers, you'll also keep them coming back to your store.

Why does adding on replacement accessories matter?

- 1. Accessories increase the opportunity for repeat business and foot traffic for years after a purchase
- 2. Accessories offer a profit margin of 40%-60%*
- 3. By helping their appliances work great, accessories create happy customers
- 4. With 80% of customers never replacing their water filter, accessories are an opportunity to create new business

PUR® filtration system

Water filters reduce contaminants from household water for up to six months and offer a 40% profit margin.* Select models offer filtered water from an interior or exterior dispenser.

Why sell water filters?

- 1. Your customers can save up to \$600 a year with a PUR® water filtration system** instead of buying bottled water
- 2. Use a PUR® water filter and help prevent the disposal of over 3,000 plastic bottles a year**
- 3. 18 million consumers need to change their water filters every six months for optimal performance
- 4. Replacement filters increase repeat business, because 68% of consumers purchase them from the same store where they bought their refrigerator

Tips for using replacement filters

Push filter: FILTER 1

Models that take this filter have a push-filter set up. Your customers can easily insert this replacement filter by pushing the filter in with the arrow facing upward and closing the door.

Turn filters: FILTER 2 & FILTER 4

Models that take this filter have a turn-filter set up. Your customers can easily install this replacement filter by inserting it into the housing, and turning it clockwise to snap into place.

NOTE: Information on filter availability for individual models can be found in specifications chart on page 21.

The ethylene effect

See for yourself how ethylene gas can affect produce. The FreshFlow™ produce preserver helps keep these fruits and vegetables fresh. To find out more visit whirlpool.com/producepreserver

Food type	Sensitivity to Ethylene Gas††	Effect of Ethylene Exposure††
Iceberg lettuce	High	Russet spotting
Broccoli	High	Yellowing
Cantaloupe	Moderate	Mold

FreshFlow™ produce preserver

Extend the freshness of produce by up to four days† with a filter that absorbs excess ethylene gas. For optimal results, use two pouches in the holder along the crisper drawer wall.

Did you know?

The packaging's included timed sensor reminds customers to replace FreshFlow™ air filters and FreshFlow™ produce preservers every six months.

FreshFlow™ air filter

Found in the interior air tower, this carbon-based active filter circulates air to reduce common food odors, from items like onions, garlic, fish and spoiling foods. It utilizes chemical absorption when placed in any refrigerator and is 15 times more effective than baking soda at reducing odors.

†Based on commonly purchased produce. ††According to Whirlpool brand proprietary research.

NOTE: Not all features are available on all models.
*Based on MSRP and an average of top-selling accessory prices. Dealer alone determines retail prices.
**Based on use of filtered water and average use of two 6-month, 200-gallon water filters versus purchasing the same amount of leading brand bottled water.

FROM THE HEART OF AMERICA TO YOUR SALES FLOOR

Whirlpool Corporation has spent the last 100 years committed to American manufacturing. With more than 20,000 employees across the nation, the largest home appliance company in the world* is now a member of the Made in the U.S.A. Foundation's Hall of Fame. Now, more than ever, we are proud to offer customers french door refrigerators that are designed, engineered and assembled with American pride.
